

Batt Cutter/Filler

Model BC-2000/AF2000

ABM INTERNATIONAL, INC. has engineered the most revolutionary

BATT CUTTING and **FILLING MACHINES** available today. We offer the

highest quality, most advanced machinery delivering the most precise cut

and highest quality fill for many different comforters and bedspreads.

STATE OF THE ART AUTOMATIC COMFORTER FILLING EQUIPMENT

ABM International, Inc. presents a revolutionary Batt Cutting and Comforter filling machine. Our line of fully automatic fiber cutting and comforter filling machines offer:

- Incredible speed and accuracy
- Precision engineering
- Programming & options for every need

All ABM International Fiber Cutting and Filling Systems are constructed of heavy duty combination square tubing weldment and aluminum extrusion. They feature the highest quality digital electronic components, color touch screen operator interface, numerous safety features and all stainless pneumatics. The BC-2000 Batt Cutter automatically unwinds, pulls and cross cuts desired lengths of fiber while dropping them onto the AF-2000 comforter filling machine. The AF-2000 accurately fills comforters with minimal or no operator effort. Size changes from twin to king are fully automatic utilizing our unique adjustable slat and filling mouth system.

FEATURES & BENEFITS

- Full electric controls with Mitsubishi PLC and easy to use color touch screen operator interface.
- Stainless steel SMC pneumatics system and linear ball bearing rails provide for precise movements at rapid speeds.
- A rotary knife cross cutter, manufactured from the finest off the shelf components provides for a 100% smokeless environment unlike conventional hot wire cutting machines.

IN HOUSE MACHINE DESIGN

- ABM's highly trained and experienced engineering design team anxiously awaits your projects.
- Available 24 hours a day for customer service
- All machines are custom engineered and manufactured allowing the customer to select the options and features desired to maximize value and efficiency.

SPECIFICATIONS

- Electric: 220 Volt AC 5 Amps Three Phase 50/60 Cycle
- Pneumatic: 100 PSI
- Floor Space: Approx. 15' x 20'
- Weight: 4250 LBS.
